LESSON PLAN

ARMAMENT STORE PROCEDURE (33)

Class	Air Agniveer Apprentice (Engineering)	**Lesson Plan No.**	02
Total No. of Lesson Plans	8	**Time Allotted for the Session**	80 min

PART A: GUIDELINES / GENERAL INSTRUCTIONS FOR INSTRUCTORS

1. Topic	Main parts of a typical ejection seat and their purposes
2. Total No. of Sessions for this Topic	01 / 01
3. Sequence of this Session	01 / 01
4. Syllabus Extract	Main parts of a typical ejection seat and their purposes
5. Specific Objectives	33.1.1.1 Trainee will be able to explain historical development of ejection seat

6. List of Training Aids

Ser	Description	Remarks
(a)	BR/Text Book/Docket	Refer to the master syllabus reference list
(b)	Wall Charts	Nil
(c)	Films/Duration	Nil
(d)	PPT	Objective: teach the syllabus extract for this lesson
(e)	Models	Nil
(f)	CBT	Nil

7. Practical in Lab/Equipment Rooms/Simulators	Review of ejection seat components diagram; Instructor supervision required for safety briefing
8. Existing Knowledge of the Class	As per course prerequisites

PART B: DEVELOPMENT OF LESSON

9. Checking of Previous Knowledge / Introduction	Time: 10 min

(a) What is the primary function of an ejection seat?
(b) Name one historical milestone in ejection seat development.
(c) Why is the historical development of ejection seats relevant to current engineering?

10. Development of Main Lesson

Sub	Content	Method	Trg Aids	Time
(a)	• Early ejection seat concepts • Transition from rocket to pneumatic systems • Introduction of the Martin-Baker Mk 1 • Evolution of safety harnesses • Development of zero-zero capability	L & Ds	PPT, IB	15 min
(b)	• Canopy jettison mechanisms • Seat cushioning and deceleration systems • Parachute deployment sequence • Emergency release systems • Maintenance access points	L & Ds	PPT, PDF	20 min
(c)	• Integration of electronic safety systems • Modern redundancy features • Testing and certification standards • Future trends in ejection technology • Impact on pilot survivability	Practical	IB, PDF	15 min

11. Summary and Evaluation

Method	Trg Aids	Time
Q & A	IB	15 min

(a) Explain how the historical development of ejection seats improved pilot survival rates.
(b) Describe the purpose of the canopy jettison mechanism in a typical ejection seat.
(c) Identify three main parts of an ejection seat and their specific functions.

12. Home Assignment and Follow Up	Prepare a brief note on how the historical development of ejection seats influenced the design of modern ejection systems, to be discussed in the next lesson plan.

Time	5 min

PART C: PREPARATION FOR TOMORROW (PFT) DIRECTIVES FOR TRAINEES

Ser	Syllabus for PFT	References	Related LPs
1	Function of typical ejection seat	Refer to the master syllabus reference list	LP 03

PART D: PERSONAL EXPERIENCES (PE) OF INSTRUCTOR

Ser	Item	Remarks
(a)	Adequacy of time	
(b)	Suitability of training material/aids and additional aids required	
(c)	Doubts/intelligent questions raised by trainees	
(d)	Difficulties faced by instructor	
(e)	Other experience	

Instructor	**HoF (E/L)**
Signature: _____	Signature: _____

PART E: REVIEW SHEET

Date	Instructor's Comment	HOF (E/L)	Oi/C TDEC Remarks

Prepared by / Approved by

Prepared by	Approved by
Name, Rank, P No.	Name, Rank, P No.
Nov 26	Nov 26

Queries for Instructor

1. Confirm the master syllabus reference book/BR for this subject.
2. Confirm the class existing knowledge and prerequisites.
3. Confirm the session duration and sequence; 80 min and 01/01 were assumed.
4. Prepared-by/approved-by names, ranks, P numbers and dates must be filled before approval.
5. Confirm any training aids available beyond L & Ds, IB, PDF and PPT.

Timing Check

Introduction 10 + Main 50 + Summary 15 + Home 5 = 80 min
