LESSON PLAN

CORRECT AIRCRAFT MAINTENANCE PRACTICES (CAMP) (32)

Class	Air Agniveer Apprentice (Engineering)	**Lesson Plan No.**	03
Total No. of Lesson Plans	10	**Time Allotted for the Session**	80 min

PART A: GUIDELINES / GENERAL INSTRUCTIONS FOR INSTRUCTORS

1. Topic	Correct identification of different wires and connector types
2. Total No. of Sessions for this Topic	01 / 01
3. Sequence of this Session	01 / 01
4. Syllabus Extract	Correct identification of different wires and connector types
5. Specific Objectives	32.1.1.1 Trainees will understand EWIS

6. List of Training Aids

Ser	Description	Remarks
(a)	BR/Text Book/Docket	Refer to the master syllabus reference list
(b)	Wall Charts	Nil
(c)	Films/Duration	Nil
(d)	PPT	Objective: teach the syllabus extract for this lesson
(e)	Models	Nil
(f)	CBT	Nil

7. Practical in Lab/Equipment Rooms/Simulators	Identification of wire types and connector types using sample kits; Safety: Handle wires gently to avoid insulation damage; Supervision: Instructor verifies correct identification of all samples
8. Existing Knowledge of the Class	As per course prerequisites

PART B: DEVELOPMENT OF LESSON

9. Checking of Previous Knowledge / Introduction	Time: 10 min

(a) What does EWIS stand for?
(b) Why is correct wire identification critical for aircraft safety?
(c) List three factors that determine wire color coding.

10. Development of Main Lesson

Sub	Content	Method	Trg Aids	Time
(a)	• Definition and scope of EWIS • Wire identification standards and color codes • Types of insulation materials used • Wire gauge and current carrying capacity • Termination methods and crimping basics	L & Ds	PPT, IB	15 min
(b)	• Connector types: Pin, Socket, and Ring • Environmental ratings and sealing mechanisms • Identification of quick-disconnect vs. fixed connectors • Color coding for specific systems (Hydraulic, Electrical) • Inspection criteria for connector integrity	L & Ds	PPT, PDF	20 min
(c)	• Common defects in wires and connectors • Proper storage and handling procedures • Documentation requirements for wire replacement • Troubleshooting identification errors • Safety precautions during identification tasks	Practical	IB, PDF	15 min

11. Summary and Evaluation

Method	Trg Aids	Time
Q & A	IB	15 min

(a) Explain the significance of the color code in wire identification.
(b) Differentiate between a quick-disconnect and a fixed connector.
(c) Describe two common defects that can occur in aircraft wiring.

12. Home Assignment and Follow Up	Prepare a brief note on how incorrect wire identification could lead to system failure, referencing the next lesson on navigation of critical aircraft wiring systems.

Time	5 min

PART C: PREPARATION FOR TOMORROW (PFT) DIRECTIVES FOR TRAINEES

Ser	Syllabus for PFT	References	Related LPs
1	Construction and navigation of critical aircraft wiring systems	Refer to the master syllabus reference list	LP 04

PART D: PERSONAL EXPERIENCES (PE) OF INSTRUCTOR

Ser	Item	Remarks
(a)	Adequacy of time	
(b)	Suitability of training material/aids and additional aids required	
(c)	Doubts/intelligent questions raised by trainees	
(d)	Difficulties faced by instructor	
(e)	Other experience	

Instructor	**HoF (E/L)**
Signature: _____	Signature: _____

PART E: REVIEW SHEET

Date	Instructor's Comment	HOF (E/L)	Oi/C TDEC Remarks

Prepared by / Approved by

Queries for Instructor

1. Confirm the master syllabus reference book/BR for this subject.
2. Confirm the class existing knowledge and prerequisites.
3. Confirm the session duration and sequence; 80 min and 01/01 were assumed.
4. Prepared-by/approved-by names, ranks, P numbers and dates must be filled before approval.
5. Confirm any training aids available beyond L & Ds, IB, PDF and PPT.

Timing Check

Introduction 10 + Main 50 + Summary 15 + Home 5 = 80 min
