LESSON PLAN

HELICOPTER THEORY (11)

Class	Air Agniveer Apprentice (Engineering)	**Lesson Plan No.**	25
Total No. of Lesson Plans	27	**Time Allotted for the Session**	80 min

PART A: GUIDELINES / GENERAL INSTRUCTIONS FOR INSTRUCTORS

1. Topic	Longitudinal dynamic stability, lateral dynamic stability
2. Total No. of Sessions for this Topic	01 / 01
3. Sequence of this Session	01 / 01
4. Syllabus Extract	Longitudinal dynamic stability, lateral dynamic stability. Directional static stability, prop effects, damping in Yaw, directional control, Effect of wing sweep back, spin, lateral dynamic stability.
5. Specific Objectives	11.1.4.1 Trainee will be able to describe aircraft stability in all the three axis

6. List of Training Aids

Ser	Description	Remarks
(a)	BR/Text Book/Docket	Refer to the master syllabus reference list
(b)	Wall Charts	Nil
(c)	Films/Duration	Nil
(d)	PPT	Objective: teach the syllabus extract for this lesson
(e)	Models	Nil
(f)	CBT	Nil

7. Practical in Lab/Equipment Rooms/Simulators	Review of stability axes diagrams; Instructor supervision required for diagram interpretation
8. Existing Knowledge of the Class	As per course prerequisites

PART B: DEVELOPMENT OF LESSON

9. Checking of Previous Knowledge / Introduction	Time: 10 min

(a) Define static stability in the longitudinal axis.
(b) List the three axes of aircraft motion.
(c) Explain the role of the horizontal stabilizer in pitch stability.

10. Development of Main Lesson

Sub	Content	Method	Trg Aids	Time
(a)	• Longitudinal dynamic stability definition • Phugoid oscillation characteristics • Short period oscillation dynamics • Damping effects in pitch motion	L & Ds	PPT, IB	15 min
(b)	• Lateral dynamic stability overview • Dutch roll motion analysis • Effect of wing sweep back • Directional static stability and prop effects	L & Ds	PPT, PDF	20 min
(c)	• Directional control mechanisms • Spin entry and recovery basics • Damping in yaw axis • Summary of dynamic stability types	Practical	IB, PDF	15 min

11. Summary and Evaluation

Method	Trg Aids	Time
Q & A	IB	15 min

(a) Differentiate between phugoid and short period oscillations.
(b) Describe how wing sweep back affects lateral stability.
(c) Explain the relationship between directional static stability and damping in yaw.

12. Home Assignment and Follow Up	Prepare a brief note comparing the dynamic stability characteristics of a helicopter versus a fixed-wing aircraft, referencing LP 02.
Time	5 min

PART C: PREPARATION FOR TOMORROW (PFT) DIRECTIVES FOR TRAINEES

Ser	Syllabus for PFT	References	Related LPs
1	Dynamic stability: longitudinal and lateral, Phugoid, Dutch roll, Fixed wing autorotation. Short period oscillation, spiral divergence and Directional divergence.	Refer to the master syllabus reference list	LP 26

PART D: PERSONAL EXPERIENCES (PE) OF INSTRUCTOR

Ser	Item	Remarks
(a)	Adequacy of time	
(b)	Suitability of training material/aids and additional aids required	
(c)	Doubts/intelligent questions raised by trainees	
(d)	Difficulties faced by instructor	
(e)	Other experience	

Instructor	**HoF (E/L)**
Signature: _____	Signature: _____

PART E: REVIEW SHEET

Date	Instructor's Comment	HOF (E/L)	Oi/C TDEC Remarks

Prepared by / Approved by

Prepared by	Approved by

Nov 26	Nov 26

Queries for Instructor

1. Confirm the master syllabus reference book/BR for this subject.
2. Confirm the class existing knowledge and prerequisites.
3. Confirm the session duration and sequence; 80 min and 01/01 were assumed.
4. Prepared-by/approved-by names, ranks, P numbers and dates must be filled before approval.
5. Confirm any training aids available beyond L & Ds, IB, PDF and PPT.

Timing Check

Introduction 10 + Main 50 + Summary 15 + Home 5 = 80 min
